## How to figure proper ventilation

### Industry Standard for Proper Ventilation:

1 sq. ft. of ventilation for every 300 sq. ft. of attic space with 50% in ridge and 50% in soffit.

### RidgeMaster, RidgeMaster Plus

& HipMaster: 12.228 sq. in. per lineal foot—  
Net Free Ventilation

### Example: 2,000 sq. ft. attic

- 40' x 50' = 2,000 sq. ft. attic.
- 2000 sq. ft./300 sq. ft. = 6.67 sq. ft. (total ventilation req.)
- 6.67 x 144 = 960 sq. in. (conversion to inches)
- 960 sq. in. = 480 sq. in. (ridge) + 480 sq. in. (soffit)

A 50' ridge with RidgeMaster installed equals approximately 600 sq. in. of ventilation. (more than industry standards)
